TECHNICAL DATA SHEET

D-800-INOX Seed drying cabinet

Perfectly suitable for drying grape seeds, pumpkin seeds, paprika, herbs, vegetable seeds (eg. eggplant seeds) and other types of seeds.

The D-800-INOX Seed drying cabinet is manufactured using stainless steel according to food hygiene requirements: primarily we recommend for those farmers who are working in the field of food raw material production and processing, also for organic producers and manufacturers engaged in food production. We use certified stainless steel raw materials during production to guarantee the high quality and reliability expected of the dried product.

The material to be dried contacts only the stainless steel surface during the drying process.

The advantages of D-800-INOX Seed drying cabinet

- It has three inox trays, 2m² each, which means a large, 6m² drying surface.
- The INOX trays can be ordered with different diameter of inox wire cloth so it can be suitable for drying any kind of seeds.
- Industrial heaters with various performance and run (electric and gas) can be connected to it.
- With 4 wheels it can easily be moved or relocated.
- Through its simple structure it is easy to use and clean.
- It requires minimal maintenance.
